

Reimagining ACS Spring & Fall Meetings

Enhanced Program

Focused on enriching the programming approach and improving the attendee experience

Optimize meeting footprint and allowing for an easier to navigate meeting experience

Increase joint and interdisciplinary programming

Elevate poster sessions

Enhance networking opportunities, offering greater interaction for both presenters and attendees

Innovative Program

Sessions to offer solutions to global scientific challenges

Evolve, flexible, and market-driven programming to meet changing needs of ACS diverse audiences

Address industry needs for networking, solutions-focused sessions, and offering more career-related activities

Provide increased variations in program formats to drive engagement, such as fireside chats and panel discussions

Offer timely, late breaking programming topics

Invite prominent experts and speakers to lead thought-provoking sessions on innovation and industry facing challenges

ACS Digital Meeting

Increase global engagement and diversity of programming

Global Virtual Symposia

Emphasize a more global approach to programming

Increase comprehensive and relevant programming

Enhance global networking capability

Virtual Only Sessions

Share selective content from Enhanced and Innovative programs

Provide unique, robust virtual content in local time zones

Offer 24-hour programming using a new virtual platform

Measures of success

Cultivate participation and diversity across all demographics.

Create an engaging meeting experience by increasing attendance and participation from industry, global, early career and students.

Expand interdisciplinary programming.
